Devslopes
Full Stack Web Development Program
Nov 2022 – Sep 2025

Codecademy
Full-Stack Engineer Path (Certificate)
Sep 2025 – Oct 2026

Open to full stack web developer roles & internships. Remote, hybrid, or on-site.

SUMMARY

Full stack web developer experienced in building React user interfaces and integrating backend services and third-party APIs, including AI models. Completed a front-end internship at Spot Parking, shipping production UI components on a live product team. Holds the Codecademy Full-Stack Engineer certificate (Oct 2026).

EXPERIENCE

Junior React Developer — Spot Parking (Internship) Jan 2026 – Jun 2026
Provo, UT

- Built and shipped UI components and features in React for Spot Parking's live smart-parking and mobility platform.
- Translated designs into responsive, reusable components within a team Git workflow.

Data Labeler — Tesla Jan 2025 – Present

- Partnered with engineering teams to deploy tools company-wide following successful pilot phases.
- Ranked in the top 5% company-wide for productivity, accuracy, and reliability.

Site Manager — Wiggy Wash Dec 2017 – Sep 2021

- Led a team of 20+ employees and increased annual revenue by 110% through performance coaching.
- Analyzed daily operations to resolve workflow bottlenecks, reducing customer complaints and smoothing shift handovers.

PROJECTS

ClackForge React · TypeScript · Express · PostgreSQL · three.js

Full stack e-commerce store for custom mechanical keyboards with a real-time 3D configurator. Server-verified pricing, Google OAuth, Stripe test checkout, an admin dashboard, and row-locked group-buy drops that prevent overselling.

clackforge-client.onrender.com · github.com/nickgriff99/clackforge

TheListingHub Rebuild Next.js · TypeScript · Supabase · Stripe

Portfolio redesign of a commercial real estate classifieds platform. Listings catalog and detail pages, email and Google sign-in, and Stripe test-mode sponsor checkout with signed webhooks. Deployed on Netlify.

thelistinghub-demo.netlify.app · github.com/nickgriff99/preishare-project

Event-Sourced Wallet Dashboard Node.js · TypeScript · PostgreSQL · WebSockets

Real-time digital wallet backend where balances are computed by replaying immutable events. Includes snapshots, optimistic concurrency control, point-in-time balance queries, and live WebSocket updates to a web dashboard.
